

PLAZMAX[®]

E-TAP

MECHANISED TAPPING ARM

PLAZMAX®

The Plazmax E-TAP is the perfect mobile hole tapping solution for any serious workshop.

KEY FEATURES

- The heavy duty 1200mm x 800mm castor mounted industrial work table makes it effortless to manoeuvre around your workshop and into place
- 90 degree range of movement tapping both vertical and horizontal holes
- Includes 10 x DIN Series Quick Change Collets in a range of common tap sizes. Additional sized collets can be ordered separately if required
- Working radius of 1300mm
- Separate magnetic base allows the arm to be taken off the workbench and used in other locations
- Designed and compliant to a 220V 50HZ AS/NZS standard
- Unit comes flat-packed

From the touch screen console the user can select from automated presets, or adjust variables such as torque, thread pitch, speed and depth.

The Plazmax E-Tap's castor mounted industrial work table makes it effortless to manoeuvre around your workshop and into place, and with a 90 degree range of movement tapping both vertical and horizontal holes couldn't be easier.

E-Tap's powerful digital drive motor and clutch system maximises the lifespan of your taps and ensures a level of consistency that just can't be achieved with manual tapping.

AVAILABLE IN 2 VERSIONS

PET20 (1000w);
Tap Range M3 - M20

PET30 (1200w);
Tap Range M6 - M30
